ICT & MRL DEPARTMENT

1) Self-directed Learning (SDL) through the Use of ICT

In line with MOE's ICT Masterplan 4 (MP4), the school has created varied opportunities for our students to exhibit SDL and CoL competencies through the use of ICT in their learning. Students who are self-directed learners achieve greater learner success by taking ownership of their learning and extending it beyond what is taught in school.

Various platforms have been introduced to students to encourage them to take responsibility for their own learning. One platform that is used comprehensively by our teachers is the Asklearn Portal (http://lms.asklearn.com/taonan_sch) which provides a wide array of online resources that serve to reinforce or stretch students' learning.

Similarly, **BrainPOP** (<http://www.brainpop.com>), an animated educational website for students, also offers a rich source of age-appropriate learning content for English, Mathematics and Science. Subscription to this website for our students has been covered.

This year, the CL Department uses the **ezhishi** website (www.ezhishi.net) for all students for self-directed learning. CL teachers will be guiding the students on the login procedure in Term 2.

P1 students will also be introduced to the Dudu CL Online Personalised Learning Programme (<http://go.dudu.town>). It is a programme that aims to foster students' interest in CL, as well as their CL proficiency, through reading. Dudu contains hundreds of beautifully illustrated eBooks with various difficulty levels.

Dudu adopts an adaptive learning approach to provide personalized and differentiated learning for each student. It analyses the students' reading proficiency level and recommends eBooks that are suited for their reading level. Therefore, through such an e-Learning activity, students are able to learn at their own pace and students have more control over their learning process and can better customize their learning.

As students' reading proficiency improves, they will be recommended more eBooks of higher difficulty levels. This will allow students to constantly be presented with eBooks that are suitable for their reading ability, so that they will be able to gradually improve their command of CL. Ultimately this will motivate students to want to master CL.

Students can bring SDL to a higher level when they set their own learning goals, work towards them and reflect on them. SDL can be achieved with encouragement and support from teachers and parents alike. We hope that you can partner us to encourage your child/ ward in continuing this SDL journey in the home setting as well.

2) Cyber Wellness Festival

As part of the school's efforts to raise awareness on Cyber Wellness, activities booths will be set up in the hall for students on **16, 17 and 18 May**.
